GENERAL INFORMATION

UNIVERSAL STRUCTURAL STEEL LTD. was established in the year 2016. The company has developed into a premier development, construction and consultancy which providing the service in the stage of conceptualization to detailed planning, design, construction and engineering for varied and diverse discipline of projects. Its professional achievements include a large number of consultant & construction assignments spread all over Bangladesh.

UNIVERSAL STRUCTURAL STEEL LTD. is a construction company and we provide different construction services like residential building, commercial complex, industrial building, bridges and steel structure as per international code of standards. Our technical experts are blessed with global expertise.

OUR MISSION & VISION

Mission Statement

Our mission is to provide workmanship and customer service to maintain the highest level of professionalism honesty. We keep a professionalism and fairness in our relationship with our customers, employees and vendors. To grow by continually providing useful and significant products, services and solutions to markets, we already serve and to expand new areas that build on our competencies and customer interests.

Vision Statement

Our vision is to be the preferred contractor of choice. A company that our customers want to work with and our employees are proud to work for.

MESSAGE FROM THE MANAGING DIRECTOR

Dear valued clients,

Take my warmest welcome to **Universal Structural Steel Ltd.** At **Universal Structural Steel Ltd.**, we believe that strong structures begin with strong values. Since our inception, our mission has been to contribute to the development of modern infrastructure by delivering high-quality steel structures with precision, reliability, and innovation.

Our company specializes in the design, fabrication, and erection of Pre-Engineered Buildings (PEB) and structural steel solutions for industrial, commercial, and infrastructure projects. With a skilled engineering team, advanced fabrication facilities, and a commitment to international standards, we continually strive to deliver efficient, cost-effective solutions for our clients.

The growth of **Universal Structural Steel Ltd.** has been driven by the trust of our valued clients, the dedication of our employees, and the support of our partners. We take great pride in maintaining the highest standards of quality, safety, and timely project delivery.

As Bangladesh continues to progress rapidly in industrialization and infrastructure development, we remain committed to supporting this journey by providing innovative steel construction solutions that meet the evolving needs of the market.

On behalf of **Universal Structural Steel Ltd.**, I extend my sincere gratitude to our clients, partners, and team members for their continued trust and cooperation. We look forward to building stronger partnerships and shaping a stronger future together.

Regards

Engr. Md. Sultan Mahmud

B.Sc. Engineer (Civil), KUET, MIEB.

Managing Director

Universal Structural Steel Ltd.

INTRODUCTION

Registered Company Name: **UNIVERSAL STRUCTURAL STEEL LTD.**

Sister Concerns of the Company:

Business Highlights: Concept to Construction.

Business Goals: Customer's satisfaction is our first choice ensuring quality full materials, in time project completion, proper management, maintaining a good relation with clients to be market leader in the relevant field.

Head Office: House # 16/6 (2nd Floor), Block # B, Road # Babor Road, Mohammadpur, Shyamoli, Dhaka-1207.

Factory: North Kasor, Square Master Bari, Bhaluka, Mymensingh.

Hotline : +88 01537 528 399, +88 01729 298 919

E-mail: universalssltd@gmail.com

OUR SERVICES

CONSULTANCY SERVICES

- Industrial Planning & Machine layout Plan
- Architectural Planning & Design
- Structural (R.C.C & Steel Building) Design
- Electrical Design
- Fire Fighting Design
- Sanitary & Plumbing Design
- RAJUK/CDA/KDA/RDA Approval
- WTP & ETP Design
- NDT Test of Welding
- RSC/NIRAPON/ELEVATE/ DIFE Consultation (D.E.A Consultancy)
- Digital Survey & Sub Soil Investigation
- Interior Design
- Green Building Consultation

CONSTRUCTION SOLUTIONS SERVICES

- R.C.C & Steel Structures Construction
- Retrofitting (R.C.C & Steel Structures)
- Epoxy Anchor Supply & Installation
- Controlled Concrete Breaking
- Diamond Core Drilling
- Hammer Test, Core Test & Ferro Scanning
- Water & Damp Proofing
- Water Proofing Membrane
- Heat Reflecting Coating
- Water Proof Coating Treatment
- Pressure Grout Injecting Treatment
- Power Tools & Accessories Supply
- Floor Hardener Treatment
- PU Flooring Treatment
- Epoxy Flooring Treatment
- Epoxy Inject Treatment
- Rust Remover, Pest Control
- Expansion Joint Sealant
- Acrylic and Other Painting
- Non-shrink Grouting
- Structural Crack Repair/Injection and
- Supply of All Kinds of Construction Chemicals Like
 - Concrete Admixtures
 - Micro-Concrete
 - Bonding Agent
 - Curing Compounds, Membranes, etc.
- ETP/WTP Design & Construction
- Swimming Pools Design & Construction
- Construction Materials Supply
- Industrial Rack
- Aluminum Composite Panel Works
- Cementitious Fireproofing
- Fire Separation
- Galvanizing Works
- Glass Fabrication
- Polish Concrete
- Industrials Solutions

PRE-ENGINEERED BUILDING

Pre-Engineered Building Concept:

Pre-Engineered Building (PEB) use a pre-determined inventory of raw materials that has proven over time to satisfy a wide range of structural and aesthetic design requirements. This flexibility allows PEB to fulfill an almost unlimited range of building configurations, custom designs, requirements and application.

A pre-engineered building is a building, shell utilizing three distinct product categories:

1. Built-up 'T' shaped primary structural framing members (Columns and Rafters)
2. Cold formed "Z" and "C" shaped secondary structural members (Roof Purlins, Eave Struts and Wall Girts)
3. Roll formed profiled sheeting (Roof and Wall panels)

Optional structural subsystems are widely incorporated into pre-engineered buildings and provide functional as well as aesthetic features.

Functional subsystem includes mezzanine floors (including joists and decking), crane runway beams (to support crane systems), roof platforms, catwalks etc.

Aesthetic features include facias, parapets, canopies and roof extensions.

Until 1990, the use of pre-engineered buildings were confined mostly to North America and the Middle East. Since then, the use of pre-engineered buildings has spread throughout Asia and Africa where the PEB construction concept has now been widely accepted and praised.

A growing number of prominent international contractors and designers, who previously specified conventional structural steel building exclusively, have recently converted to the pre-engineered building approach. They now enjoy significant cost savings and benefits from the faster construction cycle resulting from the concept.

PRE-ENGINEERED BUILDING

In the USA, where the PEB concept was originally conceived during the early years of this century, nearly 70% of all single-story non-residential construction now utilizes pre-engineered buildings. Applications range from small car parking sheds to 90m (+), wide clear span aircraft hangers to low rise multi storied buildings. Almost every conceivable building use has been achieved using the pre-engineered building approach.

Aviation & Military

- Aircrafts hangars
- Administration buildings
- Residential barracks
- Support facilities

Agricultural

- Poultry buildings
- Dairy farms
- Green-house
- Grain storage
- Animal confinement

The most common applications of pre-engineered buildings are:

Industrial

- Factories
- Workshops
- Warehouses
- Cold stores
- Car parking sheds
- Slaughter houses
- Bulk product storage

Commercial

- Showrooms
- Distribution centers
- Super markets
- Fast food restaurants
- Offices
- Labor camps
- Service station
- Shopping centers

Institutional

- Schools
- Exhibition halls
- Hospitals
- Theaters/Auditoriums
- Sports halls

Recreational

- Gymnasiums
- Swimming pool
- Enclosures
- indoor tennis courts

MATERIALS SPECIFICATION

Sl. No.	Components	Specifications	Strength
01.	Built-up section	M.S. Plate-ASTM A572-50 grade.	$F_y = 345 \text{ MPa}$
02.	Purlin and Girt	Rolled formed steel. Minimum yield stress 275 MPa.	$F_y(\text{min}) = 275 \text{ MPa}$
03.	Exterior roof and wall cladding, including gutter, down pipe, capping, flashing etc. (painted)	Hi-Ten painted 0.47mm thick steel profile sheets with min. yield strength of 550 N/mm^2 coated with an alloy of 55% aluminum, 45% Zinc, coating mass shall be 150 gm/m^2 conforming to Australian standard AS1397: 1993-G550-AZ150.	$F_y = 550 \text{ N/mm}^2$
04.	Anchor Bolts	Galvanized/ naturally quenched black.	$F_y = 24.50 \text{ kN/cm}^2$ $F_y = 35.0 \text{ kN/cm}^2$
05.	Bubble (Air Bubble) Insulation	a) Roll size- $55\text{M} \times 1.20\text{M}$ b) Thermal conductivity- 0.001 W/m.k at 30°C d) Heat resister : 2.98	
06.	Translucent Sheet for Sky Light	2 mm thick fiber glass profile sheets made of UV-resistance resin.	
07.	High Strength Bolts	A325 M Type 1 Hot Dip galvanized/ naturally quenched black.	$F_t = 55 \text{ kN/cm}^2$
08.	Fastener	Imported heavy duty hex head self-taping screws with neoprene washer.	Screw (gauge 12) = 5.43mm Tensile breaking load = 1852 kg; Pull out load = 148 kgs (Test plate = steel A36, 5mm thick)

APPLICABLE DESIGN CODES

The PEB system was originally developed in the USA. The US design codes that are applicable to the design of PEB's are noted below.

Universal Structural Steel Limited is committed to using the latest editions, supplements and addenda of the following codes in the analysis, design and fabrication of its PEB's.

American Institute of Steel Construction (AISC)
